### Table of Contents

- I. Safe Prisons/PREA Program  
Correctional Institutions Division
- II. PREA Ombudsman
- III. Office of Inspector General
- IV. Appendices
  - Reported Offender-on-Offender Sexual Assault Violations by Penal Code Section and Current Disposition – Penal Codes 22.011 and 22.021
  - Reported Staff-on-Offender Sexual Assault Violations by Penal Code Section and Current Disposition – Penal Code 22.011 and 22.021
  - Reported Staff-on-Offender Improper Sexual Activity with a Person in Custody Violations by Penal Code Section and Current Disposition – Penal Code 39.04
  - Calendar Year 2014 – 2015 Reported Sexual Assault and Improper Sexual Activity With a Person in Custody Violations – Counts by Penal Code Section
  - Offender-on-Offender Sexual Assault Case Counts by Incident Location – Penal Codes 22.011 and 22.021
  - Staff-on-Offender Sexual Assault Case Counts by Incident Location – Penal Codes 22.011 and 22.021
  - Staff-on-Offender Improper Sexual Activity with a Person In Custody Case Counts by Incident Location – Penal Code 39.04

## **SAFE PRISONS/PREA PROGRAM**

### **Correctional Institutions Division**

The Texas Department of Criminal Justice (TDCJ) operates a Safe Prisons/PREA Program for the purpose of preventing and limiting offender-on-offender sexual abuse, physical assaults and extortion. The TDCJ strives to maintain the safety and security of all offenders incarcerated within the agency.<sup>1</sup>

The components of the Safe Prisons Program are as follows:

**I. Education of Correctional Officers and staff about the importance of preventing sexual abuse, extortion and offender physical assault.**

The education of correctional officers and staff on the importance of preventing sexual abuse, extortion and offender physical assaults is one of the primary objectives of the Safe Prisons Program. A key component of the objective is the reliable transmittal of information from the Safe Prisons/PREA Program Management Office (SPPPMO) to the facility staff. To accomplish this objective notices to staff are routinely distributed at agency meetings regarding the Safe Prisons Program and the TDCJ's policy regarding offender protection issues.

Sexual abuse awareness posters (in both Spanish and English) are posted in all facilities in areas readily accessible to staff as well as offenders. These posters are intended to raise awareness of the issue of sexual abuse, provide direction regarding various methods to report allegations and emphasize the agency's "zero-tolerance" policy on sexual abuse within its correctional facilities. The agency requires facility administrators to display the posters in strategically located areas identifying an individual at the facility level, and at the agency headquarters, who the offender, staff and visitors can contact to report allegations of sexual abuse.

The Correctional Training and Staff Development (CTSD) Department provides practical and relevant training services to correctional officers and supervisors in order to prepare them to support and carry out the mission of the TDCJ. The TDCJ recognizes that to be successful in providing safety and security to the offender population requires competent, well-trained, uniformed and non-uniformed correctional staff. Within the CTSD Department are five instructional training programs, each designated to facilitate specialized targeted training to respective unit correctional staff, providing them the information and skills necessary to perform their duties and functions safely and effectively within the offender population. The five instructional training programs offered are as follows:

---

<sup>1</sup> Safe Prisons/PREA Program report is based on Calendar Year 2015 activity for consistency with PREA Standards, 28 C.F.R. Part §115.87 data collection requirements.

- *Pre-Service Training Program*
- *In-Service Training Program*
- *Leadership Development Training Program*
- *Specialized Training Program (Topics such as Armory Operations, Defensive Tactics, Hostage Negotiations, etc.)*
- *Ancillary Training Program*

One of the goals of the training is to provide a comprehensive, but concise overview of the Safe Prisons Program and its initiatives. Topics of discussion include identifying, addressing, and preventing sexual abuse, extortion, predation on offenders, and the Prison Rape Elimination Act (PREA). In addition, the physical characteristics of both the potential sexual abuse victims and potential predators are presented to aid in the assignment of offenders. Specific strategies are discussed in order to enhance the identification, investigation, prosecution and prevention of sexual abuse in prison.

The table below provides Calendar Year (CY) 2015 statistics related to CTSD instructional training programs containing Safe Prisons Program curriculum.

#### **CY 2015 CTSD Training Statistics**

<b>CTSD Training Programs with Safe Prisons/PREA Program Curriculum</b>	<b>CY 2015</b>	
	<b>Total Classes Conducted</b>	<b>Total Participants Completing</b>
<b>Pre-Service Training</b>	174	5,831
<b>In-Service Training</b>		
Non-Supervisor	996	22,840
Supervisor	304	5,206
CTSD Instructor In-Service	3	163
<b>Leadership Development Training</b>		
Sergeant, Food Service, and Laundry Manager Training Academy	12	774
Lieutenant Command School	7	184
Correctional Administrator Preparedness Training	3	69
Advanced Management Training for Majors	3	148
Assistant Warden Annual Training	3	137
<b>Ancillary Training Program</b>		
Staff Survivor	185	1,457
Correctional Awareness	132	687
Administrative Segregation Training	n/a*	4447
Gender Specificity Training	n/a*	845
Mental Health Training	n/a*	570

\*Completion of Administrative Segregation, Gender Specificity, and Mental Health training is documented in the employee's training record in the agency training database. Employees are not enrolled into a specific class, but rather receive these trainings as part of the On the Job Training (OJT) Program after Pre-Service.

**16-Hour Administrative Segregation Training Course** is conducted for all employees who are newly assigned to work in an Administrative Segregation housing area. This includes all newly assigned OJTs, direct hire employees, employees who are assigned to general population but are utilized to help conduct meals/movement/etc., in the Administrative Segregation housing area, and veteran employees who have been assigned to Administrative Segregation prior to creation of the 16-hour program at one facility and transfer to Administrative Segregation at a different facility. Completion of this training is documented in the TDCJ training database.

**16-hour Gender Specific Training Course** is conducted for those correctional employees that will be assigned to a unit that houses female offenders. Correctional employees who transfer to a unit that houses female offenders, and who have not previously completed the 16-hour Gender Specific Training will be required to complete the training course prior to being assigned to a shift or department. Completion of this training is documented in the TDCJ training database.

**32-Hour Mental Health Training Course** that has been as a pre-requisite training for employees assigned to designated mental health facilities, such as, Clements, Hodge, Hughes, Jester IV, Michael, Montford, Mountain View, and Skyview, has now been incorporated in to the Pre-Services Training Academy curriculum. In order to ensure all employees assigned to one of the above-mentioned facilities receive appropriate mental health training, this training is required for all employees who have not previously completed the 32-hour program (and had the completion documented in the training database) or graduated from the Pre-Service Training Academy prior to Fiscal Year 2016. Completion of this training is documented in the TDCJ training database.

The TDCJ video "Safe Prisons/PREA in Texas" re-enforces the agency's zero tolerance policy against sexual abuse and illustrates the agency's support of the Safe Prisons/PREA Program initiatives.

In addition to the TDCJ zero-tolerance policy for sexual abuse and sexual harassment, the video includes the topics of staff and offenders' right to be free from retaliation for reporting sexual abuse and sexual harassment; dynamics of sexual abuse and sexual harassment; and how to communicate effectively and professionally with offenders, including lesbian, gay, bisexual, transgender, and intersex (LGBTI). CTSD continues to present the video for viewing by correctional staff during Pre-Service and In-service training. All staff on the unit are shown the video during direct hire sessions as well to ensure compliance with the PREA standards.

The SPPMO and regional coordinators conducted quarterly trainings for unit safe prisons program managers (USPPM). The training provided staff with policy and procedure discussions on topics such as sexual abuse and extortion prevention; investigative report

writing; interviewing techniques, data collection and mainframe applications related to tracking victim and predators. The SPPPMO also held trainings related directly to the implementation and processes associated with PREA audits.

The SPPPMO prepares a sexual abuse pocket card for distribution to correctional staff. The pocket card documents the agency's zero tolerance policy on sexual abuse; steps to take if a sexual abuse occurs; definitions for the Safe Prisons/PREA Program, sexual abuse and the PREA. The pocket card also contains a list of sexual assault/abuse red flags providing staff with cues regarding victim, predator and staff behaviors and characteristics.

### **Safe Prisons Plan and Operations Manual**

Prior to January 2005, several separate agency policies and procedures addressed protection of offenders. In January 2005, the *Safe Prisons Plan* was approved. The plan encompasses previous policies and procedures, as well as new processes that have evolved since the inception of the SPPPMO, creating one cohesive strategy for providing staff and offender safety. The plan is periodically updated and reflects the agency's commitment to reduce incidents of extortion, protect offenders who are at increased risk of harm by others, take a proactive approach to prevent sexual abuse of offenders, address the needs of offenders who have been sexually abused, and make violators subject to criminal charges, civil liability and disciplinary action. Additionally, the TDCJ developed and implemented a *Safe Prisons Operations Manual* containing instructional guidelines and processes to enhance the overall effectiveness of the Safe Prisons Program.

The plan and operations manual sets forth the guidelines and procedures for investigating requests from offenders alleging increased risk of harm (e.g., sexual abuse, extortion and physical assault) from other offenders. It also encompasses procedures to follow when a staff member is notified by other means (other than from the offender himself) that an offender's safety has been threatened. The policy provides different options for staff to take in order to protect an offender from harm and discusses when it is appropriate to use each option. The options include, but are not limited to:

- a. Verbal intervention between offenders who are having a conflict;
- b. Changes in the housing assignments of one or more offenders within their housing area or other housing area of the same custody level, as well as changes to an offender's work assignment or work-shift hours;
- c. Placement of aggressive/assaultive offenders in administrative segregation or review for a change of custody (e.g., due to major disciplinary offenses);
- d. Transfer to another unit;
- e. Assignment to safekeeping status;
- f. Assignment to protective safekeeping custody; or
- g. Recommendation for transfer pursuant to the Interstate Corrections Compact.

The TDCJ revised the *Safe Prisons Plan* and the *Safe Prisons Operations Manual* in response to the National PREA standards. The newly titled *Safe Prisons/PREA Plan* and *Safe Prisons/PREA Operations Manual* were implemented in August 2014.

The policy revisions includes new definitions relating to incidents of sexual abuse and sexual harassment of incarcerated offenders. Although many TDCJ policies were already in compliance with the federal Prison Rape Elimination Act (PREA) Standards, other policies were revised to incorporate the requirements contained within the PREA standards.

With the finalization of the PREA standards in August 2012, confinement agencies are required to ensure that each facility operated by the agency, or by private organization on behalf of the agency, is audited by auditors certified through the U.S. Department of Justice. The PREA standards mandates one-third of each facility type is audited by PREA auditors utilizing the approved PREA audit instrument during each one-year cycle starting August 20, 2013.

The PREA audit consists of three phases; the pre-audit, audit and post audit. The pre-audit involves the completion of the Pre-Audit Questionnaire by the facility PREA Manager, or warden designee that is forwarded to the auditor prior to the onsite audit. The onsite audit consists of a facility tour, additional document review, and interviews of staff and offenders. During the post audit phase the auditor determines the unit's compliance of meeting the standards, the final report and if necessary corrective action and/or an appeal process.

In August 2014, the TDCJ began contracting for independent PREA audits of the 95 state operated and 14 privately operated facilities (PF). In CY 2014, a total of 17 facilities were audited and in CY 2015, a total of 33 facilities were audited with all facilities meeting compliance with the PREA Standards. The agency publishes the PREA auditor's final report on the TDCJ website in the Administrative Review and Risk Management Division webpage.

**CY14 Completed PREA Audits**

<b>Unit</b>	<b>Audit Date</b>	<b>Audit Status</b>
Billy Moore (PF)	August 20, 2014	Passed
East Texas (PF)	August 11, 2014	Passed
Goodman	August 27, 2014	Passed

Ellis	December 9-11, 2015	Passed
Stevenson	December 16-18, 2015	Passed

## II. Education of newly received offenders on the risks of sexual assault, as well as the prosecution process.

Available in English and Spanish, the *Offender Orientation Handbook* is provided to all offenders upon admission. The handbook includes information related to offender protection, sexual abuse prevention, and reporting and perpetrator consequences for engaging in sexually aggressive behavior. The information is also provided during the new unit of assignment orientation process.

The TDCJ Offender Peer Education Program is a program that provides education training for offenders in the prevention of prison rape, PREA, and health services issues such as HIV, hepatitis and other communicable diseases. The training is delivered within 30 days of an offender's arrival into TDCJ. The program consists of a 12-hour training that is split into two separate divisions; (9 hours) Wall Talk for males or Woman to Woman for females that focuses on health issues and (3 hours) Sexual Assault Awareness that focuses on prevention of sexual abuse.

Sexual Assault Awareness Training (3 hour) program is a TDCJ Safe Prisons/PREA Program that offers offender education and training to teach other offenders on sexual assault awareness and prevention. The curriculum, provided in English and Spanish, help teach offenders on strategies to avoid victimization and emphasizes that offender-on-offender assault is not to be expected or tolerated. Peer educators receive initial training to be peer educators and are provided with a manual titled, "Safe Prisons Peer Educator Training Manual" that provides guidelines, activities and background information to teach the three-hour session.

### **III. Screening for Risk of Sexual Victimization and Abusiveness**

The *Safe Prisons/PREA Plan* and the *Safe Prisons/PREA Operations Manual* requires an assessment of all offenders during an intake screening and upon transfer to another unit for his or her risk of being sexually abused by other offenders or sexually abusive toward other offenders. The Safe Prisons/PREA Program Offender Assessment Screening tool was revised to include specific criteria mandated by the federal PREA standards to assess offenders for risk of sexual victimization. One component of the assessment tool directs staff to document offenders who identify as LGBTI. An offender who identifies as transgender or intersex are assigned special population codes to assist in biannual reviews of any threats to safety.

### **IV. Use of offender characteristics common to offender sexual assault victims in making housing and job assignments.**

The following policies establish the use of offender characteristics in making housing and job assignments:

#### **Administrative Directive (AD)-04.17, "Offender Housing Assignment Criteria and Procedures"**

- ◆ "Housing assignments shall be made on the basis of an offender's total record and as required by the offender's current needs and circumstances, as reflected in the offender's unit/facility file, Health Summary for Classification form, the information contained in the offender's computerized classification record and unit/facility record, in order to ensure that each offender receives appropriate and adequate safety, supervision and treatment."
  
- ◆ "The following are criteria relative to offenders' security characteristics which, in addition to custody designation, shall be considered in making housing assignments:

- a. Criminal history;
- b. Current offense (type and seriousness), sentence length and amount of time completed on sentence;
- c. The offender's age and number of prior adult incarcerations;
- d. Violent or passive tendencies;
- e. Criminal sophistication;
- f. Offender enemies;
- g. Homosexual (both active and passive) tendencies;
- h. Physical characteristics such as height and weight;
- i. Security threat group affiliation;
- j. Current institutional adjustment, as reflected in the offender's disciplinary record; and
- k. Special safety requirements."

AD-04.68, "Offenders Requiring Single-Cell Housing":

- ◆ "This policy outlines those categories of offenders who require a single-cell due to vulnerability, medical or mental health problems, developmentally disabled, or other reasons related to offender health, safety, or security, in accordance with state law and TDCJ plans and policies."
- ◆ Characteristics related to weakness and vulnerability (e.g., offenders who are easily exploited due to age, size, developmental impairment, physical weakness, sexual preference, and other similar traits) shall be considered in making the discretionary determination to single-cell offenders in safekeeping.

AD-04.18 (rev. 5), "Offender Jobs: Assignments, Job Descriptions, Selection Criteria, Work Programs and Supervision"

- ◆ "The TDCJ shall provide work opportunities and establish offender job programs in accordance with state and federal law. Job assignments shall be based on rational and objective criteria and in such a manner as to ensure that the safety, security, treatment and rehabilitative needs of the offenders are met."
- ◆ The following security-related criteria shall be considered in making job assignments:
  - a. Custody;
  - b. Security precaution designators;
  - c. Criminal history, to include all prior adult incarcerations;
  - d. Current offense, length of sentence and time served on sentence;
  - e. Violent or passive tendencies;
  - f. Offender enemies;
  - g. Security Threat Group (STG) affiliation;
  - h. Current institutional adjustment, as reflected in the offender's disciplinary record; and

- i. Special safety requirements.

**V. Use of an offender’s assault history in making housing assignments.**

The use of an offender’s assault history in making cell assignments is set forth in the following policies:

AD-04.17, “Offender Housing Assignment Criteria and Procedures”

- ◆ “Unless there are specific mitigating circumstances, an offender shall not be assigned to dormitory housing at an ID unit, irrespective of his custody designation, if:
  1. The offender has been convicted within the previous 12 months of a disciplinary offense involving possession of a weapon; or
  2. The offender has been convicted within the previous 24 months of a disciplinary offense involving either assault with a weapon or aggressive (or assaultive) sexual misconduct; or
  3. The offender demonstrates a recent pattern of in-prison assaultive behavior.”

Safe Prisons/PREA Plan:

- ◆ “Placement of Aggressive/Assaultive Offenders in Administrative Segregation or Change of Custody Due to Major Disciplinary Offenses.

A change of custody for the offender-aggressor in accordance with the *Disciplinary Rules and Procedures for Offenders* and *Classification Plan* is also an option. Instead of placing the more vulnerable offender in another housing area, this option removes the offender who has engaged in aggressive or assaultive behavior. Although a change in custody cannot be effected by unit/facility administration, it may be authorized by the Unit Classification Committee (UCC) without further approval unless it involves placing the aggressor in administrative segregation (maximum custody). Assignment of an offender to administrative segregation is conducted in accordance with the *Administrative Segregation Plan*. Removing the aggressor not only protects the offender specifically found to be at risk, but other offenders in their housing area as well. Additionally, placing the offender-aggressor in a more restrictive custody classification (G4, G5 or administrative segregation) will limit their opportunity to victimize other offenders and encourage them to modify their aggressive behavior.”

**VI. Use of protective safekeeping or safekeeping status.**

Protective safekeeping is a classification for those offenders who require separate housing due to threats of harm by others or the likelihood of victimization. These offenders require a higher degree of safety and security in a more controlled environment in order to provide for their protection.

Safekeeping is a status assigned to offenders who require separate housing within general population because of a potential for victimization due to threats to their safety, a history of homosexual behavior, or LGBTI identity, or other similar reasons. Offenders assigned to safekeeping status are separated from other general population offender by housing assignment. This separation makes it difficult for general population offenders to enter their housing areas. In addition, safekeeping offenders receive their recreation time and meals apart from the general population.

The following factors are taken into consideration as well as any other relevant circumstances prior to placement in protective safekeeping or safekeeping:

1. Any objective evidence discovered during an investigation that would indicate an offender is being extorted or victimized. Examples of objective evidence include visible physical injuries, medical reports, commissary account records, witness accounts and other similar evidence;
2. Offender's physical size;
3. Mental/physical impairments;
4. Age/first time offender;
5. Sexual orientation (claims of homosexuality should be corroborated by permanent records, disciplinary reports or any other evidence to support homosexual activity);
6. Determination whether the alleged problem is unit or geographic specific. If an offender's problem is confined to a specific individual, alternatives such as cell changes or unit transfer could alleviate the situation;
7. Factors that would preclude an offender's placement into safekeeping. For example, it would not be prudent to recommend safekeeping for an offender who has a felony conviction for sexual assault of another offender; or
8. An offender's previous history in safekeeping status on prior commitment.

Staff from the Classification and Records Department produces a monthly activity report that tracks:

1. Requests for protective safekeeping/safekeeping/transfers;
2. Offenders placed in protective safekeeping/safekeeping/transfers;
3. Offenders denied protective safekeeping/safekeeping/transfers; and
4. Requests that include allegations of extortion, sexual assault and violence;

The *Classification Plan* sets forth the characteristics and boundaries of protective safekeeping and safekeeping, while the *Safe Prisons/PREA Plan* discusses the procedures to be used in assisting offenders who may need protection.

## **VII. Use of surveillance cameras.**

As of December 31, 2015, there were 8,984 surveillance cameras on units across the state. Of these, 4,486 are in housing areas (dormitory and cell block areas). Installation

of comprehensive surveillance systems at the Coffield, Allred, and Telford units were in progress and nearing completion. Surveillance systems projects were initiated at the Robertson and Michael units during CY 2015. Following completion of existing projects the total number of cameras on facilities will increase to approximately 12,477. This equipment will enhance efforts to prevent contraband from entering the TDCJ correctional facilities, and will increase offender and staff safety by substantially increasing the number of surveillance cameras on targeted maximum security institutions.

**VIII. Education of correctional officers and staff on the care and protection for offenders who have been assaulted.**

- ◆ Staff are oriented on and required to be familiar with the *Safe Prisons/PREA Plan*. This policy sets forth the philosophy of the TDCJ regarding the duty to protect offenders. It also sets forth guidelines and procedures for investigating allegations of offender victimization and measures to prevent an offender from being victimized.
- ◆ A lesson plan entitled “Offender Victim Representatives Sexual Abuse Training” was designed to develop appropriate skills in psychologists, sociologists, chaplains, social workers and case managers to provide counseling and emotional support services for an offender who alleges sexual abuse and undergoes a forensic medical exam. State law identifies offender victim representatives as psychologists, sociologists, case managers, and chaplains. The SPPPMO and the TDCJ sexual assault nurse examiner (SANE) coordinator facilitate training annually for all newly designated offender victim representatives. The Offender Victim Representative (OVR) curriculum was revised in 2014 to include the effects of trauma on the brain and classroom activities. The SPPPMO sought assistance from the Texas Association Against Sexual Assault (TAASA) by requesting review of the course revisions to ensure accuracy of course information. TAASA provided several recommendations regarding presentation flow which was applied to the 2014 curriculum revision. A total of 113 new OVR’s were trained in CY 2015.
- ◆ The CTSD Department Pre-Service program consists of a Health and Wellness – Suicide Prevention lesson that includes a 14-minute video entitled “Responding to Offender Suicides and Attempted Suicides” that details the responsibilities of staff in these critical situations. The TDCJ provided training on suicide prevention to 5,831 new cadets and 22,840 veteran correctional officers during pre-service and in-service academies in CY 2015. In addition, 5,260 correctional supervisors participated in suicide prevention training during in-service.
- ◆ Pamphlets placed in visiting areas in various prison units, state jails and private facilities include “Suicide Prevention – How You Can Help” to assist families in identifying risk factors for incarcerated loved ones who may be suicidal.
- ◆ Pocket cards containing suicide risk factors have been distributed to all TDCJ units. The pocket cards help alert staff to offenders who may exhibit signs or symptoms that put them at risk for suicide.

## **IX. Tracking and reporting of alleged sexual abuse.**

Organizationally, the director of the Correctional Institutions Division (CID) serves as the Safe Prisons/PREA Program coordinator. The SPPPMO conducts statistical analysis of alleged sexual abuse; monitors each alleged incident to ensure agency compliance with current policies; identifies issues for further policy development; and facilitates training and awareness programs for staff and offenders.

Historically, alleged offender-on-offender sexual abuse and other serious/unusual incidents were reported to the Emergency Action Center (EAC). Beginning in September 2013, allegations of staff-on-offender sexual abuse and staff-on-offender sexual harassment are also reported to the EAC. Prior to that date, allegations involving staff were investigated but only the allegations that met the elements of the Texas Penal Code for Sexual Assault or Improper Relationship with a Person in Custody were tracked for reporting purposes. The new term which defines staff-on-offender sexual abuse, includes allegations of attempted, threatened and requested acts, and occurrences of invasion of privacy and voyeurism.

Initially, all incidents of alleged sexual abuse are reported to EAC, who makes the reports available to the SPPPMO, the Office of Inspector General (OIG) and the PREA ombudsman. After reviewing the allegations, the OIG advises the TDCJ of those incidents that meet the elements of the penal code. In addition to reports received through EAC, the OIG receives reports through other sources. Information reported to OIG from other sources is not processed through EAC; however, it is reconciled monthly for statistical purposes. Alleged sexual abuse and staff-on-offender sexual harassment reported through EAC may require an administrative review. The requirement is based upon the outcome of the investigation; unfounded allegations do not require an administrative review. An administrative review is a detailed report that is submitted by the warden through the appropriate regional director to the EAC. Any findings requiring recommendations or corrective action must have a follow-up within 90 days to the deputy director of Prison and Jail Operations.

Allegations of sexual abuse are reviewed by the OIG. OIG determines if the incident meets the elements of a felony penal code violation. When OIG determines the allegation meets the elements of a penal code, a thorough criminal investigation is conducted. If probable cause is established or if there is sufficient information to make a determination regarding the allegation, the formal criminal felony investigation is presented to the Special Prosecution Unit (SPU) or the local district attorney for possible prosecution.

The deputy director of Prison and Jail Operations and the deputy director of Management Operations, review administrative review reports regarding sexual abuse within the TDCJ facilities. In addition, the PREA ombudsman reviews the administrative reviews associated with allegations of sexual abuse and staff-on-offender sexual harassment.

Classification designators have been developed for electronic notification and tracking of offender sexual predators, potential sexual predators and potential sex victims on the TDCJ

mainframe. This designator enables the unit administration to identify offenders who are more likely to be sexual predators and victims.

TDCJ has a total of 152 staff members assigned full-time to Safe Prisons/PREA management offices across the state. There are 142 unit based employees whose primary responsibility is the management of Safe Prisons/PREA operations, investigations, tracking, and analysis on the unit level. There are six regional Safe Prisons/PREA managers assigned to regional offices and four full-time Safe Prisons/PREA management office staff assigned to the central office. The Safe Prisons/PREA program manager and the TBCJ PREA ombudsman received PREA Auditor Certification through the Department of Justice.

## **X. Other Initiatives**

A sexual predator database/mainframe application helps in the process of identifying potential predators and victims on the facilities. The database is a collaborative effort between the SPPPMO, Classification & Records and the OIG, the law enforcement arm of the TDCJ. All allegations of sexual abuse are referred to the OIG for assessment of criminal or administrative violations and applicable investigation. The SPPPMO policies outline the process for identifying potential predators which encompasses OIG case reporting, unit identification, and analytical data from the database. Appropriate codes are then identified and added by the Safe Prisons/PREA Program manager on the TDCJ mainframe system. This identification assists in decisions regarding housing or programmatic assignments both within the institutions and post-release. The mainframe application includes tracking of extortion predators and victims.

The SPPPMO conducts analysis of all alleged offender-on-offender sexual abuse incidents. The analysis identifies trends related to the time of day allegations are more likely to be made, physical location, and custody classes with a higher rate of alleged sexual abuse reports. This information is passed on to the units to enable them to make decisions related to their staffing plans, building schedules, physical plants and housing assignments.

The SPPPMO identifies trends related to the age, height and weight of both victims and predators. This information is passed on to the facilities to make staff aware of these physical characteristics when determining housing assignments.

Medical services are provided to offenders through the university medical school health care providers. Medical services personnel oversee any medical examination performed in response to an allegation of sexual assault. Offenders are transported to a free world facility for the administration of the forensic collection kit. Information obtained from the offender during the medical interview, evaluation and examination are shared with OIG investigators. In order to enhance coordination of the medical process with security personnel, the TDCJ officials hired a sexual assault examination coordinator who is a licensed registered nurse and a certified sexual assault nurse examiner. The nurse is responsible for planning and implementing training for unit level nurses, mid-level practitioners (physician assistants and advanced practice nurses), physicians, and mental health care practitioners. The training for clinical staff includes how to detect and assess

signs of sexual assault/abuse, how to respond effectively and professionally, how and to whom to report allegations or suspicions of sexual assault/abuse or sexual harassment. Health care administrative staff are included in general training topics. The coordinator is also responsible for providing liaison functions with non-health care departments in the TDCJ.

During CY 2015, the sexual assault examination coordinator conducted 19 In-Service sessions on Safe Prisons/PREA topics and forensic medical examinations with 193 medical and mental health professionals attending.

Agency policy requires correctional staff to notify the OIG staff following an alleged sexual abuse report. Upon notification of an alleged sexual abuse, the OIG staff begins the investigation process through the collection of information obtained in one-on-one interviews with the victim and alleged perpetrator. The OIG staff are responsible for determining the need for a sexual assault evidence collection exam to be performed by medical staff. The OIG investigator may consult with the onsite medical personnel regarding the necessity of such an exam. The location of the alleged sexual abuse is secured and checked for any evidence, which is collected. Upon receipt of all investigative data, the OIG investigator reviews the information to assess whether it meets the elements of an offense.

Additionally, the OIG coordinates and consults with security personnel on sexual assaults initiatives, both pro-active and re-active, utilizing covert surveillance equipment and enhanced investigative processes. As state of Texas certified Peace Officers, OIG investigators are required to participate in annual continuing education and training. While the state of Texas sets the mandatory training topics, the OIG also adds training topics that are tailored specifically for OIG investigators and sexual assault investigations.

The OIG record management system (RMS) maintains information on all criminal and administrative investigations. The RMS also provides statistical reports related the aforementioned investigations.

The TDCJ collaborates with several community-based organizations on a Human Immunodeficiency Virus (HIV) offender peer education program. The Wall Talk Curriculum – Peer Education Program concept provides for offenders being trained as peer educators to share information to their counterparts on such topics as infectious diseases, sexually transmitted diseases and other health related topics. The program includes training offender peer educators; increasing the knowledge level of the peer educators and recipients of the training session; and expanding the number of topics addressed.

The Health Services Peer Education Coordinator manages the peer education services and performance for the Wall Talk Program. The agency provides a similar peer education program as a component of the Safe Prisons/PREA Program. Officials partnered/contracted (grant-funded) with local community based organizations to assist with the development of a curriculum, printing of attendant training materials, and to provide training (three hours) to peer educators.

The Sexual Abuse Awareness Curriculum - Peer Education Program utilizes offender peer educators to discuss issues of prevention, reporting, and state and federal laws pertaining to sexual abuse. This direct intervention helps change certain perceptions and attitudes among the offender population regarding prison sexual abuse. Due to the success of this concept with other prison based initiatives, the TDCJ implemented the peer education program at all units with the exception of psychiatric inpatient, intermediate sanction, and substance abuse treatment facilities. These facilities provide PREA curriculum during orientation. In CY 2015, 520 new offender peer educators were trained with a total of 1,495 peer educators system wide.

In CY 2015, peer educators conducted 2,270 Sexual Abuse Awareness classes with 53,758 offender participants attending. The Sexual Abuse Awareness curriculum is currently being provided in 97 state and private contract correctional facilities. In addition, a Spanish Sexual Abuse Awareness curriculum was developed and implemented to assist Spanish speaking offenders with limited English proficiency. In CY 2015, 638 Spanish Sexual Abuse Awareness classes were conducted with 2,110 offender participants attending. In addition, the Sexual Abuse Awareness class was incorporated into the Gang Renouncement and Disassociation (GRAD) process during Phase II of the program. In CY 2015, a total of 3 Sexual Abuse Awareness classes were conducted during Phase II with 41 offender participants attending. A peer education coordinator manages the peer education services and monitors performance of program operations. The peer education coordinator works in collaboration with the agency's Health Services Division to update the curriculum as required.

In 2013, the Safe Prisons/PREA Program Management Office collaborated with the TDCJ Media Services Division in the production of an offender educational video, titled Safe Prisons/PREA Offender Training. The video explains the TDCJ zero tolerance policy regarding sexual abuse and sexual harassment. Additionally, offenders learn how to report incidents or suspicions of sexual abuse and sexual harassment; understand their rights to be free from sexual abuse and sexual harassment and to be free from retaliation for reporting such incidents. Furthermore, offenders gain knowledge of TDCJ policies and procedures for responding to issues of sexual abuse and sexual harassment.

The SPPPMO takes an active role in ensuring that appropriate services are provided to offender victims of sexual abuse. For example, the SPPPMO collaborated with CTSD, Health Services Division and Victim Services Division to develop an approved training curriculum for offender victim representatives who provide support and resources to offenders that are administered an evidence collection kit due to an alleged sexual abuse incident. The TDCJ continues to educate additional staff to ensure adequate services are available at each of the agency's units to address the victim's needs.

Offenders processed for admissions into the TDCJ receive an Offender Orientation Handbook that is designed to inform them of prison life, agency policies and their roles and responsibilities. The TDCJ conducts an enhanced offender orientation process at 24 major intake facilities that deliver a formal presentation on prison life. The ten-hour curriculum is comprised of two segments: a five-hour video or live presentation conducted by an individual employee illustrates general information documented in the Offender

Orientation Handbook, and a five-hour peer education segment that includes the Sexual Abuse Awareness curriculum and a comprehensive educational awareness segment on health services topics. In addition, offenders receive the Sexual Abuse Awareness brochure containing information on sexual abuse prevention, reporting and what steps to take if an assault occurs.

## **XI. Demonstration Projects to Establish “Zero Tolerance” Cultures for Sexual Assault in Correctional Facilities.**

In June 2015, the Safe Prisons/PREA Program Management Office applied for the Department of Justice PREA Program Grant: Demonstration Projects to Establish “Zero Tolerance” Cultures for Sexual Assault in Correctional Facilities. The grant application titled, “Safe Prisons Information Tracking System” involves a Safe Prisons/PREA informational data system to enhance the preventative infrastructure and technology for each TDCJ state operated and contract facility. Design strategies focus on specific PREA standard requirements, which include: §115.41, Screening for risk of victimization and abusiveness; §115.42, Use of screening information; §115.62, Agency protection duties; §115.65, Coordinated response; §115.71, Criminal and administrative agency investigations; §115.81, Medical and mental health screenings and history of sexual abuse; §115.83, Ongoing medical and mental health care for sexual abuse victims and abusers; §115.86, Sexual abuse incident reviews; §115.87, Data collection; and §115.88, Data review for corrective action. Application of an enhanced web-based information and management system, will not only increase the agency’s effectiveness with identifying and managing vulnerable and predatory offenders, it will also enhance the current process for completing offender protection investigations and offender PREA assessments. Additionally, the web-based system will link to other departmental databases, expedite review processes, create greater statistical analysis capabilities, and facilitate tracking offender victim/predator sexual abuse activity; thereby, strengthening the agency’s zero tolerance policy.

In September 2015, the Safe Prisons/PREA Program Management Office was awarded the grant in the amount of \$875,326 (\$437,663 federal / \$437,663 in-kind match) for a two year period beginning October 1, 2015 through September 30, 2017. The project was in the early stages of implementation during the latter part of CY 2015.

## **XII. Prison Rape Elimination Act of 2003**

On September 4, 2003, President George W. Bush signed PREA into law (Public Law 108-79) to address the issue of sexual violence in prisons. Two key components of the act were the appointments of the National Prison Rape Elimination Commission (NPREC), and the Review Panel on Prison Rape.

The Commission or NPREC is a bipartisan panel created by Congress and charged with studying federal, state and local government policies and practices related to the prevention, detection, response and monitoring of sexual abuse in correction and detention facilities in the United States. The Commission completed the study and reported its

findings, conclusions and recommendations to the United States President, United States Congress, the United States Attorney General and other federal and state officials.

The Commission conducted eight public hearings between June 2005 and December 2007. The purpose of the hearings was to gather documentation and listen to testimony of correctional professionals and offender advocacy groups to assist in the preparation of the report and the drafting of the standards. The TDCJ administrators participated in three of the hearings; assisted the Commission in FY 2008 by providing documents utilized in preparing the standards, and submitted an agency response to the request for public comments on the draft of the PREA Standards. In addition, the Allred Unit in Iowa Park, Texas was chosen to participate in the Standards Implementation Needs Assessment (SINA) Project in June 2008, which provided unit staff the opportunity to speak directly with representatives drafting the PREA Standards to discuss the possible effects the implementation of the standards would have on correctional facilities.

The three member Review Panel on Prison Rape was created to conduct hearings on prison rape and to interview officials who oversee the three facilities with the highest incidence of prison rape and the two facilities with the lowest incidence of prison rape in prisons, jails, and community corrections facilities.

The Bureau of Justice Statistics (BJS) conducted a National Inmate Survey (NIS) in the spring of 2007, which provided a special report to the Panel in December 2007 to assist in determining the facilities that will participate in the Panel hearings. The NIS is a self-administered survey that provides anonymity to respondents and encourages the reporting of victimization. The survey collects reports of sexual violence directly from the inmates, utilizing an Audio Computer-Assisted Self Interview (ACASI) process in which inmates interact with a computer-assisted questionnaire. A total of 146 state and federal prisons participated in the survey, with 15 of those facilities in Texas. As a consequence of the sampling error, the survey could not provide an exact ranking for all facilities as required under the PREA. However, the survey did provide the ability to statistically identify a small group of facilities with the highest rate of sexual victimization of 9.3% or greater. The report identified five correctional facilities in the state of Texas among the top ten facilities in the nation meeting this criterion.

The Panel conducted hearings in Washington, D.C. and Houston, Texas in the spring of 2008 with the TDCJ administrators and unit officials from the five facilities in Texas participating in the hearing in Houston. The hearing included a visit to a local prison facility, and testimony from TDCJ administrators and employees. In addition, the TDCJ provided documentation on existing policies and procedures; information related to the reporting and processing of administrative and criminal investigations of allegations of sexual abuse, and reports on grievances and disciplinary cases concerning sexual abuse alleged against offenders or staff.

The Panel published its findings and policy recommendations in its *Report On Rape In Federal And State Prisons In The U.S.* in August 2008. The Panel identified several common characteristics of victims of inmate-on-inmate prison rape, which may include one or more of the following:

- ◆ Physical attributes (height, weight);
- ◆ Smaller inmates housed with larger cellmates;
- ◆ Age of the victim in contrast to the assailant;
- ◆ Nature of the victim's current offense;
- ◆ History of prior incarceration;
- ◆ Mental illness or physical limitations;
- ◆ Lack of gang affiliation or social support;
- ◆ Low self-confidence, or
- ◆ Vulnerability to extortion.

In addition, the Panel identified common characteristics of inmate sexual assault perpetrators. The study indicated:

- ◆ Larger inmates are more prone to assault smaller cellmates;
- ◆ Inmates that have a history of committing sexual offenses or engaging in sexual misconduct are at higher risk of committing sexual abuse;
- ◆ Inmates with a history of incarceration are more prone to engage in sexual abuse;
- ◆ Inmates with a history of engaging in violence are more prone to engage in sexual violence;
- ◆ Inmates that engage in extortion are more prone to engage in sexual abuse;
- ◆ Inmates' gang affiliation may determine if they are more prone to engage in sexual abuse, and
- ◆ Inmates exhibiting aggressive attitudes during the intake process are more prone to engage in sexual abuse.

The Panel concluded its report with recommendations to policymakers and correctional administrators based on information and testimonies obtained from the hearings. In June 2009, the Commission submitted their final report and recommendations for National PREA Standards to the United States Attorney General.

### **National Inmate Survey - 2**

The BJS conducted its second round of National Inmate Surveys (NIS-2) between October 2008 and December 2009. There were 167 state and federal prisons, 86 jails, and ten special confinement facilities operated by Immigration and Customs Enforcement, the U.S. Military, and correctional authorities in Indian country that participated in the survey, with 19 of those facilities in Texas. The survey provided facility rankings with eight male prisons, two female prisons, and six jails identified as "high rate" facilities based on survey responses regarding the prevalence of inmate-on-inmate sexual victimization and four male prisons, two female prisons, and five jails identified as "high rate" based on the prevalence of staff sexual misconduct. The report, titled *Sexual Victimization in Prisons and Jails Reported by Inmates, 2008-09*, which was made public in August 2010, identified three male correctional facilities in the state of Texas among the "high rate" of inmate-on-inmate sexual victimization and one male correctional facility with a "high rate" of staff sexual

misconduct. Seven male prisons, four female prisons and nine jails were identified as “low rate” facilities based on a small percentage of inmates reporting any sexual victimization by another inmate or staff. Three of the Texas correctional facilities were identified among the “low rate”, which included one male facility and two female facilities.

The Panel conducted hearings in Washington, D.C. in the spring of 2011 with TDCJ administrators and unit officials from one facility identified in the “high rate” and one facility with “low rate” participating in the hearing. The hearing was preceded with a unit visit from a member of the Panel and staff associated with the Department of Justice (DOJ) on the two facilities selected to testify in Washington, D.C. In addition, the TDCJ provided documentation on existing policies and procedures; information related to the reporting and processing of administrative and criminal investigations of allegations of sexual abuse, and reports on grievances and disciplinary cases concerning sexual abuse alleged against offender or staff. The Panel published its findings in the Review Panel on Prison Rape’s *Report on Sexual Victimization in Prisons and Jails* in April 2012.

### **National Inmate Survey - 3**

Data collection for the third round of the National Inmate Surveys (NIS-3) for 22 randomly selected Texas facilities began November 7, 2011 and continued through April 13, 2012. Key elements of the NIS-3 included random samples of inmates who are 16 years old or older housed in adult facilities, as this population had not been included in any previous PREA study. In addition, the survey instrument was modified to include measure of mental and physical health, as well as indicators of facility safety and security. The data collected from the NIS-3 was intended to provide additional information on inmate risk factors and identify facility characteristics related to variations in sexual victimization.

In May 2013, the BJS released its final report, titled *Sexual Victimization in Prisons and Jails Reported by Inmates, 2011-12*. The report highlighted a sample of 241 state and federal prisons was drawn to produce a sample representing approximately 10% of the 1,158 state and 194 federal adult confinement facilities. The survey was conducted by the RTI International as in the previous two surveys. The survey was administered to 106,532 offenders ages 16 or older, with 43,721 of those offenders specifically incarcerated in 233 state and federal prisons with the remaining 62,811 offender incarcerated in jails, ICE, Indian country jails, and military facilities.

Nationwide results of the NIS-3 indicated seven male prisons and six female prisons were identified as “low rate” facilities based on a small percentage of offenders reporting any sexual victimization by another inmate or staff, with the TDCJ having one female prison identified in this category. Nationally, 11 male prisons and one female prison were identified as “high rate” facilities based on the reported prevalence of inmate-on-inmate sexual victimization, with the TDCJ having three male prisons identified in this category. Eight male prisons and four female prisons were identified as “high rate” facilities based on the reported prevalence of staff sexual misconduct, with the TDCJ having two male prisons identified in this category.

## **PREA Standards**

The proposed Standards titled “*Standards for the Prevention, Detection, Response, and Monitoring of Sexual Abuse in Adult Prisons and Jails*” are separated into five categories; 40 standard statements; an assessment checklist for each standard statement; and a discussion of each standard. The discussion provides explanation for the rationale of the standard and offers guidance for achieving compliance which provides commentary and guidance.

In March 2010, the DOJ published an Advance Notice of Proposed Rulemaking (ANPRM) to solicit public input on the Commission’s proposed national standards prior to publishing a final rule adopting the standards. The DOJ welcomed all comments, including comments addressing specific standards proposed by the Commission. In May 2010, the agency submitted its comments on 13 of the 40 standards. In addition, the DOJ specifically requested comments regarding three general questions.

Following receipt of approximately 650 comments, the DOJ carefully considered each comment and modified the NPREC proposed standards. On February 3, 2011, the DOJ published the Notice of Proposed Rulemaking (28 C.F.R. Part 115) to propose such national standards for comment and to respond to the public comments received on the ANPRM. The TDCJ had relatively few issues relating to the recommendations offered by the DOJ because most of the recommendations were similar to agency policy. For this reason and because the DOJ considered the comments submitted in 2010, the TDCJ had few issues relating to the proposed national standards.

On May 16, 2012, the DOJ released its final rule adopting national standards to prevent, detect, and respond to sexual abuse in confinement facilities, pursuant to the Prison Rape Elimination Act of 2003. Subpart A, Standards for Adult Prisons and Jails contain 44 operational standards within 11 distinct sections contained in the following list:

1. Prevention planning;
2. Responsive planning;
3. Training and education;
4. Screening for risk of sexual victimization and abusiveness;
5. Reporting;
6. Official response following an inmate report;
7. Investigations;
8. Discipline;
9. Medical and mental care;
10. Data collection and review; and
11. Audits.

PREA Standards require state governors to certify full compliance with the standards or be subject to the loss of five percent of any DOJ grant funds that would otherwise be received for prison purposes, unless the governor submits an assurance that such five percent will be used only for the purpose of enabling the state to achieve and certify full compliance with the standards in the future. The preliminary review indicated the agency was already substantially compliant with most of the standards. As previously indicated on page seven

and eight, during CY 2014 the TDCJ demonstrated full compliance with the PREA standards on 14 state operated and three private contract facilities. In CY 2015, the TDCJ further demonstrated PREA compliance on 26 state operated and seven private contract facilities. TDCJ anticipates 34 state operated and six private facilities will undergo a PREA audit during CY 2016. The TDCJ remains committed to achieving full compliance certification on all facilities. Scheduling of the PREA audits will consist of approximately one-third of the TDCJ facilities per year.

## **PREA OMBUDSMAN**

The 80<sup>th</sup> Texas Legislature passed legislation in 2007 establishing the appointment of an ombudsman to the Texas Board of Criminal Justice (TBCJ). The primary purpose of the ombudsman is to coordinate the TDCJ's efforts to eliminate the occurrence of sexual abuse and sexual harassment in correctional facilities. The primary responsibilities of the ombudsman are to: (1) monitor TDCJ policies and procedures for the prevention of sexual abuse in correctional facilities as well as compliance with PREA ombudsman policies and procedures (2) oversee the administrative investigation of offender complaints of sexual abuse and sexual harassment (3) process complaints and inquiries from elected officials, the public, and offenders concerning sexual abuse and sexual harassment and ensure the impartial resolution, and (4) collect statistics regarding all allegations of sexual abuse from correctional facilities in accordance with the National PREA standards.

### **Monitoring Agency Policies**

In 2015, the PREA ombudsman reviewed the TDCJ policies related to the prevention, detection, reporting and investigation of sexual abuse and sexual harassment in correctional facilities to ensure the duties and responsibilities of the PREA ombudsman are reflected within the policies. The PREA ombudsman is included in the TDCJ policy review process, which submits agency policies to administrators for review and comments before adoption. Being a part of the review process enables the PREA ombudsman to provide responses to policies that may impact the duties and responsibilities of the PREA ombudsman and assess the impact the PREA standards may have on the current policies and procedures. In 2015, The PREA ombudsman monitored the compliance of the processing of allegations of sexual abuse and sexual harassment with agency policies, and researched best practices in the areas of sexual abuse prevention, detection, reporting, investigation and education. Most of the research involved reviewing best practices identified by the BJS, the NIC, and the National PREA Resource Center; attending conferences that provide the opportunity to network with correctional professionals involved with issues related to sexual abuse in prison, and sharing information with other correctional professionals across the United States. Best practices identified by the PREA ombudsman were shared with the director of the TDCJ – CID for consideration and possible implementation.

### **Oversight of Administrative Investigations**

In CY 2015, the PREA ombudsman monitored the administrative investigations of allegations of sexual abuse and staff-on-offender sexual harassment. Allegations of sexual abuse and staff-on-offender sexual harassment are reported to EAC within three hours of the allegation being reported to facility staff. Once the EAC receives the incident report, the report is available to the PREA Ombudsman Office for review. Upon completion of the investigation, the facility administrator completes an administrative review detailing information specific to the incident. In CY 2015, the PREA Ombudsman Office reviewed 713 administrative investigations pertaining to allegations of offender-on-offender sexual abuse and 896 allegations of staff-on-offender sexual abuse and sexual harassment.

## **Impartial Resolution of Complaints of Sexual Abuse**

The PREA ombudsman processes complaints and inquiries concerning offenders incarcerated in the TDCJ correctional facilities and the public concerning allegations of sexual abuse and sexual harassment.

The PREA ombudsman reports directly to the chairman of the TBCJ, providing an external source where public inquiries can be processed and investigations conducted that are independent of the investigations conducted by TDCJ staff, ensuring an impartial resolution to those complaints. This process provides multiple avenues for oversight of allegations of sexual abuse and sexual harassment to occur.

In CY 2015, the PREA Ombudsman Office received 1,733 public and offender inquiries. 573 were referred to various TDCJ departments for processing. The remaining 1,160 inquiries were processed by the PREA Ombudsman Office. Public and offender inquiries are received through various reporting methods. In CY 2015, of the 1,733 public and offender inquiries, 123 were received by email; 1,485 were received by mail; 44 were received by fax; and 81 were received telephonically. Public inquiries are received from various sources and categorized as “legislative” or “general” inquiry. Of the 1733 public inquiries, 10 were categorized as “legislative” and 324 were categorized as “general.” Of the 1733 public and offender inquiries, 1398 were received by offenders assigned in a TDCJ secure facility. TDCJ staff are also provided with a method to privately report sexual abuse and sexual harassment to the PREA Ombudsman Office. Of the 1,733 inquiries, one report was received in the PREA Ombudsman Office from TDCJ staff during CY 2015.

Anyone can report allegations of sexual abuse and sexual harassment to the PREA ombudsman. However, due to the serious nature of sexual abuse, anyone knowledgeable of an offender-on-offender or staff-on-offender sexual abuse that occurs within a TDCJ correctional facility is encouraged to immediately report the allegation. Offenders incarcerated in the TDCJ are encouraged to immediately report allegations of sexual abuse and sexual harassment to correctional staff on their current facility. However, offenders may report allegations of sexual abuse and sexual harassment directly to the PREA Ombudsman Office, the OIG, the SPPPMO, or the TDCJ - ombudsman coordinator. In addition, offenders may report allegations of sexual abuse or sexual harassment through the grievance process. The TDCJ employees are required to immediately report allegations of sexual abuse and sexual harassment to their supervisors.

Friends of offenders incarcerated in the TDCJ, family members and the general public are encouraged to report allegations of sexual abuse and sexual harassment to the PREA Ombudsman Office. Public inquiries concerning allegations of sexual abuse received by the TBCJ and the TDCJ – ombudsman coordinator are referred to the PREA Ombudsman Office for investigation and response. Inquiries pertaining to allegations of sexual abuse and sexual harassment received by the PREA ombudsman are reported immediately (same day received) to unit administration for investigation and appropriate administrative action. A thorough investigation is conducted and a comprehensive report is forwarded to the PREA Ombudsman Office for review. Depending on the results of the investigation, the PREA Ombudsman Office may elect to conduct a subsequent

interview and investigation. In addition, all allegations of sexual abuse are referred to the OIG for possible criminal investigation.

### **Collection of Statistical Data**

In CY 2015, the PREA ombudsman assisted in the coordination of data requested by the BJS for the completion of the National Survey of Sexual Victimization for 2015. In addition, the PREA ombudsman coordinated with the TDCJ Executive Services Department, the SPPPMO and the OIG to monitor the collection of data associated with sexual abuse in prisons to ensure accuracy of data utilized in reports to agency administrators and responses to public requests concerning PREA related statistics. The procedures include monthly reconciliation of the number of offender-on-offender allegations of sexual abuse and staff-on-offender sexual abuse and sexual harassment that are reported to EAC and the PREA ombudsman and identifying those allegations that meet the elements of the Texas Penal Code for Sexual Assault (Texas Penal Code 22.011) and Aggravated Sexual Assault (Texas Penal Code 22.021) and Improper Sexual Activity with a Person in Custody (Texas Penal Code 39.04) as determined by the OIG.

Initially, all allegations of sexual abuse are reported to EAC and made available to the PREA Ombudsman Office as an alleged sexual abuse. However, upon reconciliation with OIG the incidents are divided into two categories for reporting purposes. Incidents that meet the Texas Penal Code 22.011, 22.021, or 39.04 and after OIG opens a criminal case are categorized as *Nonconsensual Sexual Act*. However, incidents that do not meet the Texas Penal Codes 22.011, 22.021, and 39.04, OIG does not open a criminal case, are identified as *Abusive Sexual Contact*. These categories are consistent with BJS definitions and are used to assist in the compilation of data to complete the National Survey of Sexual Victimization each year.

During CY 2015, there were a total of 896 allegations of staff-on-offender alleged sexual abuse and sexual harassment incidents reported to the PREA ombudsman by the TDCJ. Of the 896 staff-on-offender allegations, 670 were considered sexual abuse, 75 involved sexual harassment, and 151 were categorized as voyeurism. Only 138 (21%) of the 670 allegations were identified by OIG as meeting the elements of the Texas Penal Code for Sexual Assault, Aggravated Sexual Assault, and Improper Sexual Activity with a Person in Custody.

There were 713 allegations of offender-on-offender alleged sexual abuse incidents reported to the PREA ombudsman by the TDCJ. Only 282 (39.5%) of the 713 offender-on-offender allegations were identified by OIG as meeting the elements of the Texas Penal Code for Sexual Assault or Aggravated Sexual Assault, and subsequently categorized as *Nonconsensual Sexual Act*. The remaining 431 offender-on-offender allegations were categorized as the *Abusive Sexual Contact* of one offender by another. Regardless of the category, the TDCJ policy of “zero tolerance” on sexual abuse and sexual harassment assures every allegation is thoroughly investigated and appropriate disciplinary actions taken should the allegations be substantiated.

All dispositions of administrative investigations pertaining to a *Nonconsensual Sexual Act* or *Abusive Sexual Contact* are based on the preponderance of evidence collected during the investigation. The definitions of disposition outcomes are consistent with definitions utilized by the BJS. “Substantiated” means the event was investigated and determined to have occurred; “Unsubstantiated” means the evidence was insufficient to make the final determination as to

whether or not the incident occurred; “Unfounded” means the incident was determined not to have occurred and “Investigation Ongoing” means a final determination has not yet been made as to whether the incident occurred.

The disposition of the administrative investigations monitored by the PREA ombudsman and statistical information submitted by correctional facilities are provided in the following paragraphs and tables.

Offender-On-Offender Alleged Nonconsensual Sexual Act Statistics

The PREA ombudsman received 282 reports of alleged sexual abuse from TDCJ resulting in the PREA ombudsman reviewing 282 administrative investigations identified as alleged nonconsensual sexual acts. There were 17 correctional facilities where five or more allegations were reported to have occurred. These facilities accounted for 27.4% of the allegations reported occurring in the TDCJ correctional facilities. There were 59 alleged nonconsensual sexual acts reported on a different facility than the incident allegedly occurred on. A total of seven out of the 282 incidents reported occurred on a female facility and two incidents reported occurred on a co-gender facility. Of the cases reviewed, six cases were substantiated, 45 cases were unfounded and 231 cases were unsubstantiated. The substantiated cases resulted in six cases where disciplinary penalties were administered; the unfounded cases resulted in 27 disciplinary penalties administered and three of the unsubstantiated cases resulted in disciplinary penalties being administered. There were 64 allegations that had no identified assailants; 207 allegations had one assailant and 11 allegations had multiple (two or more) assailants, resulting in a total of 520 participants. There were a total of 282 alleged victims and 238 alleged assailants reported.

The PREA Ombudsman monitors the number of convictions against assailants for the following disciplinary infractions: sexual misconduct, sexual fondling and sexual abuse. There were eight assailants who received disciplinary cases for “sexual misconduct”, and five assailants received a disciplinary case for “sexual abuse”.

Victims of alleged nonconsensual sexual acts are interviewed by the Unit Classification Committee (UCC), who makes specific recommendations based on the disposition of administrative investigations. Assailants are reviewed as needed and/or required by various TDCJ policies. The following UCC dispositions are based on the findings of the alleged nonconsensual sexual act investigations conducted by the unit administration.

<b>UCC Disposition</b>	<b>Assailant</b>	<b>Victim</b>
No Changes (Allegations Unfounded or Unsubstantiated)	177	104
Issued a Housing Change	44	67
Received a Unit Transfer	1	78
Placed in Safekeeping or Protective Safekeeping	0	7
Released by the TDCJ Prior to Hearing	3	2
Other UCC Action	13	24

One of the challenges to conducting an administrative investigation of an alleged nonconsensual sexual act is the delay in reporting the incident from the time it occurred to the time it was reported.

Consequently, offenders are informed through various media the importance of reporting allegations of sexual abuse as soon as possible, especially within 96 hours (four days). However, only 140 of the 282 incidents (49.6%) were reported within four days; 58 were reported within five to 30 days; 26 were reported within 31 to 90 days, and 58 were reported after 90 days.

Another element of the administrative investigation is to determine the location the alleged nonconsensual sexual act occurred. The following table indicates general locations where victims claimed the alleged incident occurred. The “Cellblock Housing Area” category includes general population cells and single-cell housing areas. The “Other” category depicts locations where two or less incidents were reported for a given location, or where no location information was provided.

<b>General Location</b>	<b>Occurrences</b>	<b>Percent</b>
Cellblock Housing Area	214	75.9%
Shower or Restroom Area	22	7.8%
Dormitory Housing Area	18	6.4%
Offender Dayroom	3	1.1%
Recreation Yard or Gym Area	0	0%
Other	20	7.1%

Specific offender demographic information pertaining to the reports of allegations of nonconsensual sexual acts was reviewed. Of the 282 incidents reported, 95 of the victims were Black; 63 of the victims were Hispanic, and 124 of the victims were White. Conversely, 143 of the assailants were Black; 58 of the assailants were Hispanic and 36 of the assailants were White, and one assailant was Other. The average age of the victim was 35.2 and the average age of the assailant was 36.4. However, there were 35 incidents (12.4%) where the alleged assailant was ten years or older than the alleged victim. The average height of the victim was 5’7” and the average height of the assailant was also 5’7”. There were 20 incidents (7.1%) where the alleged assailant was at least six inches taller than the alleged victim. The average weight of the alleged victim was 179.5 pounds and the average weight of the alleged assailant was 191.5 pounds. There were 25 incidents (8.9%) where the alleged assailant was at least 40 pounds heavier than the alleged victim.

Lastly, the PREA ombudsman monitored the prevalence of alleged nonconsensual sexual acts occurring on correctional facilities to determine those facilities that demonstrated an increase in reports of incidents from the previous year. In CY 2015, there were 32 facilities that demonstrated an increase of reports of incidents occurring on the facility. While the majority of the 32 facilities experienced a minimal increase, there were four facilities that had five or more allegations reported than in CY 2014. Thirty facilities demonstrated a decrease of reported incidents on the facility from the previous year. While the majority of the 30 facilities experienced a minimal decrease, there were six facilities that had greater than five fewer allegations reported than in CY 2014.

*Offender-On-Offender Abusive Sexual Contact Statistics*

The PREA ombudsman reviewed 431 administrative investigations that are deemed as abusive sexual contact. There were 37 correctional facilities where five or more allegations were reported to have occurred. These facilities accounted for 44.1% of the allegations reported occurring in TDCJ correctional facilities. There were 50 Abusive Sexual Contact cases that were reported on

a different facility than the incident allegedly occurred on. 43 of the 431 incidents occurred on a female facility and 10 occurred on a co-gender facility. Of the cases reviewed, 17 cases were substantiated, 58 cases were unfounded and 356 cases were unsubstantiated. The substantiated cases resulted in 17 cases where disciplinary penalties were administered.

The unfounded cases resulted in 40 disciplinary penalties administered and there was one unsubstantiated case resulting in a disciplinary penalty being administered. Lastly, 80 of the allegations had no identified assailants; 330 allegations had one assailant and 21 allegations had multiple (two or more) assailants, resulting in a total of 815 participants. There were a total of 431 alleged victims and 384 alleged assailants reported.

The PREA ombudsman monitors the number of convictions against assailants for the following disciplinary infractions: sexual misconduct, sexual fondling and sexual abuse. Six assailants received a disciplinary case for “sexual misconduct”; 12 assailants received disciplinary cases for “sexual fondling and there were four assailants that received a disciplinary case for “sexual abuse”.

Victims of alleged abusive sexual contact were interviewed by the UCC, which made specific recommendations based on the disposition of the administrative investigations. Assailants are reviewed by the UCC at the conclusion of the disciplinary hearing in which they were found guilty or as needed on a case-by-case basis. The following dispositions were based on the findings of the investigations conducted by the unit administration.

<b>UCC DISPOSITION</b>		
No Changes (Allegations Unfounded or Unsubstantiated)	250	164
Issued a Housing Change	107	168
Received a Job Change	2	3
Received a Unit Transfer	2	49
Placed in Safekeeping	0	8
Released by the TDCJ Prior to Hearing	1	1
Other UCC Action	22	38

Offenders are informed through various media the necessity for reporting allegations as soon as possible, especially within 96 hours (four days). However, only 246 of the 431 incidents (57.14%) were reported within four days; 100 were reported within five to 30 days; 21 were reported within 31 to 90 days; and 64 were reported after 90 days.

The following table indicates those general locations where victims claimed the alleged abusive sexual contact occurred. The “Cellblock Housing Area” category includes general population cells and single-cell housing areas. The “Other” category identifies those locations where four or less incidents were reported for a given location or where no location information was provided.

<b>General Location</b>		
Cellblock Housing Area	186	43.2%
Dormitory Housing Area	80	18.6%
Offender Dayroom	48	11.1%
Shower or Restroom Area	38	8.8%
Dining Hall or Kitchen	12	2.8%
Recreation Yard or Gym	9	2.1%
Other	58	13.5%

Specific offender demographic information pertaining to the reports of allegations of abusive sexual contact was reviewed. Of the 431 incidents reported, 118 of the victims were Black; 119 of the victims were Hispanic; 12 were Other; and 182 of the victims were White. Of the 431 incidents reported, 191 of the assailants were Black; 98 of the assailants were Hispanic; five were Other; and 90 of the assailants were White. The average age of the victim was 35 and the average age of the assailant was 36. However, there were 75 incidents (17.4%) where the alleged assailant was ten years or older than the alleged victim. The average height of the victim and the assailant was 5'6". There were 33 incidents (7.7%) where the alleged assailant was at least six inches taller than the alleged victim. The average weight of the alleged victim was 178 pounds and the average weight of the alleged assailant was 192 pounds. There were 77 incidents (17.9%) where the alleged assailant was at least 40 pounds heavier than the alleged victim.

The PREA ombudsman monitored the prevalence of alleged abusive sexual contact occurring on correctional facilities to determine those facilities that demonstrated an increase in reported incidents from the previous year. In CY 2015, there were 45 facilities that demonstrated an increase of reports of abusive sexual contact occurring on the facility. While the majority of the 45 facilities experienced a minimal increase, there were 12 facilities that had five or more allegations reported than in CY 2014. Forty-one facilities demonstrated a decrease of reported abusive sexual contact incidents on the facility. While the majority of the 41 facilities experienced a minimal decrease, there were five facilities that demonstrated a decrease of five or more reported allegations. Three of the five facilities that demonstrated a reduction in the five or more category experienced a decrease of up to 49 incidents reported than in CY 2014.

## **Texas Department of Criminal Justice OFFICE OF INSPECTOR GENERAL**

The Office of the Inspector General (OIG), in conjunction with the Correctional Institutions Division (CID), Health Services Division and the Special Prosecution Unit (SPU), and County District Attorney is committed to creating a safer environment for the TDCJ employees and offenders.

As such, the OIG will:

- Assist sexual assault victims in a supportive manner, conduct timely and thorough investigations with the goal of successfully prosecuting sexual predators.
- Ensure that all investigators comply with the training mandates set forth by the Texas Commission on Law Enforcement Education (TCOLE).
- Meet with Health Services Division and/or medical administrative staff, as appropriate, to ensure timely and appropriate medical examinations continue to be provided to sexual assault victims and to ensure proper procedures for obtaining and preserving evidence are followed.
- Meet with prosecutorial entities, as appropriate, to ensure the prosecutors are receiving comprehensive investigative reports and to provide any assistance needed for timely adjudication of sexual assault investigations.
- Maintain open lines of communication with CID administrators and staff to ensure the timely reporting of sexual assault allegations to OIG investigators; timely medical assistance to the victims; and the preservation of evidence.

### **Sexual Assault Investigative Process:**

The following delineates the sexual assault investigative process:

1. An offender makes an outcry directly to a correctional staff member; contacts the OIG directly, reports to the PREA ombudsman, or a third party or anonymous person makes a notification.
2. Upon notification, the OIG investigator will ensure that the victim offender is immediately offered a medical examination and, if appropriate, a sexual assault examination is performed. The OIG investigator will collect and preserve any physical or biological evidence recovered from the crime scene and/or sexual assault evidence collection kit and submit for analysis as appropriate. The offender victim may request the presence of a representative or where available, a community rape crisis advocate, during the forensic medical examination.
3. During the initial victim offender interview, the investigator will obtain the date, time, place, circumstances, and suspect's information relating to the sexual assault incident.

4. The OIG investigator will provide the suspect's information to security personnel to ensure the victim is isolated from the suspect.
5. If the crime scene is still active, the investigator will conduct a thorough investigation of the scene and recover any physical and/or biological evidence.
6. During the course of the investigation, witnesses, potential witnesses and possible suspects are identified, interviewed, and written statements are obtained.
7. Should DNA evidence identify a suspect, the investigator will obtain a search warrant to collect comparison DNA sample from the suspect. The comparison DNA sample is sent to the Texas Department of Public Safety (DPS) crime laboratory for analysis.
8. Completed investigations are reviewed by OIG supervisors to ensure they are accurate, complete and thorough. Completed investigations containing sufficient physical or biological evidence and/or statements that support the penal statute are presented to the SPU or District Attorney's Office of jurisdiction for criminal charges. At the prosecutor's discretion, the investigation is accepted or declined for prosecution or referred to a grand jury for indictment.

#### **Sexual Assault Case Tracking:**

The OIG Records Management System (RMS) maintains information on all criminal and administrative investigations. The RMS maintains a master name file of all parties involved in an investigation and documents the individual role of each party. The RMS also provides statistical reports related to the aforementioned investigations, which are shared with the appropriate TDCJ officials.

#### **Status of Sexual Assault Investigations:**

During CY 2015, the OIG documented 334 alleged offender-on-offender sexual assault incidents that met one of the state of Texas Penal Code definitions listed below.

- ◆ Sexual assault allegations (Texas Penal Code 22.011)
- ◆ Aggravated sexual assault allegations (Texas Penal Code 22.021)

#### **Staff-on-Offender Sexual Assault and Improper Sexual Activity with Persons in Custody:**

Additionally, during CY 2015, the OIG documented 90 alleged incidents of sexual assault and 48 alleged incidents of Improper Sexual Activity with Persons in Custody, state of Texas Penal Code 39.04.

#### **Reporting Delays:**

During CY 2015, 56 offenders made delayed sexual assault outcries greater than 365 days with the greatest being 7,772 days. Excluding the aforementioned 56 incidents, the average time for an offender to report a sexual assault was approximately 25 days.

### **Investigative Status and Dispositions:**

The following appendices provide status and disposition information, and incident location on OIG sexual assault and improper sexual activity with persons in custody investigations. “Active” or “investigation ongoing” means evidence is still being gathered, processed or evaluated, and a final determination has not yet been made. “Inactivated” investigations are temporarily halted awaiting laboratory analysis of evidence or other impediments that cause the temporary investigative cessation. “Substantiated” means the allegation was investigated and determine to have occurred, based on a preponderance of the evidence. “Unsubstantiated” means the investigation concluded that evidence was insufficient to determine whether or not the event occurred. “Unfounded” means the investigation determines that the alleged incident did not occur or the alleged incident is physically impossible to have occurred.
